Politermo Teknojolisi Nedir?

- Kaplamanın kendisi, duvara yapıştırıcı kullanılarak kolayca monte edilebilen 0,5 m²'lik hazır levhalardan oluşur.
- Her Politermo elemanı üzerinde bulunan file, montajın hızlı ve minimum işçilik maliyetiyle gerçekleşmesine olanak tanır.
Yapıya yük taşımaz ve birçok kaplama malzemesinden çok daha ekonomiktir.
- Politermo üretiminde küçük mermer talaşları kullanılmakta olup, malzemeye doğal bir görünüm kazandırır ve gerçek taş işçiliğini anımsatır.
Renk seçenekleri arasından kendi kombinasyonunuzu oluşturabilir veya
- sunulan renk tonlarından birini seçebilirsiniz
Mermer talaşları, kaplamayı ultraviyole radyasyona ve kötü hava koşullarına
- karşı dayanıklı kılan demir oksit pigmentleriyle renklendirilmiştir.
Politermo, hem iç mekan kozmetik onarımlarında hem de evin dış
- dekorasyonunda kullanılabilir.
Politermo üretiminde sadece yüksek kaliteli ve çevre dostu hammaddeler
- kullanılmaktadır.
Misyonumuz, gereksiz masraf veya çaba harcamadan insanların evlerini güzel
- ve konforlu hale getirmelerine yardımcı olmaktır.

Politermo'yu Seçmeniz İçin 10 neden

Kaplamanın kendisi, yapıştırıcı kullanılarak duvara kolayca monte edilen 0,5 m²'lik hazır levhalardan oluşur. Her Politermo elemanı üzerinde bulunan File sayesinde montaj hızlı ve minimum işçilik maliyetiyle gerçekleşir. Yapıya yük taşımaz ve birçok kaplama malzemesinden çok daha ucuzdur.

Cepheleri doğal
bileşenlerden oluşur

Çevresel etkilere
karşı direnç

Cephe sisteminin yangına
dayanıklılığı

Panellerinin
buhar geçirgenliği

Birinci sınıf bir
cephe sisteminin
estetik görünümü

Kurulum için özel
beceri
gerektirmez

Çeşitli yüzeylere
monte edilebilir

Panellerinin
sürdürülebilirliği

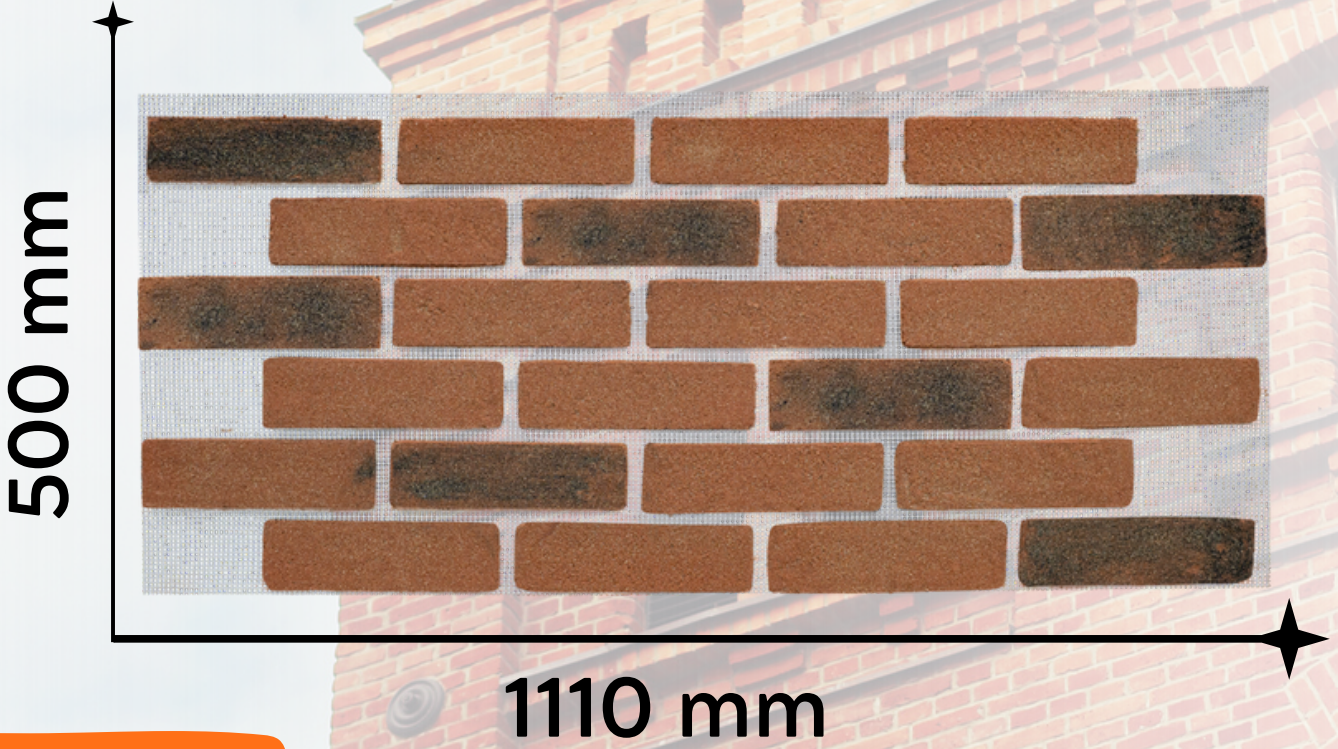

Lekeler
kolayca çıkarılır
